At all events, if the law is not repealed, where will you find a jury of human ings who will condemn one of their whatever his guilt, not only to death, but to a horrid scene of torture? No nineteenth century jury would condemn a man to be burnt at the stake. Why any more condemn him to be broiled by electric wires? Repeal the law!

The swell attachment of a family which is blessed with small children is now an East India ayah or nurse. These Hindoo attendants have for many years served in England the same purpose that the neuro nurse did with us in the era of slavery. They are supposed to be a token of a certain official distinction on the part of their masters, and their introduction dates from the days of Great Britain's grandiose career of conquest in the East Indies. Colonial officials, military and civil, sent these native attendants home with their children. Their presence thus had a meaning in the existing caste diseordon about him to protect him from tinctions of the time. Nowadays it means deadly assault for impartial rendering of nothing at all in England. Here in America it signifies the adoption of a foreign prac-tice because it is foreign and for no other reason under the sun.

The programme consists of a series of tableaux and a short operatic called "Cups and Saucers.

One week later a more elaborate entertainment will be given under the leadership of W. W. Thomas Musical Phrector of the New York and Brooklyn Amateur Opera Associations.

Leading seciety people of New Milford are embodied in the cast, and all are working diligently to insure a smooth performance.

Obtained for About \$200.

In these days of luxury and extravagance it is possible for the disciple of Izaak Walton to invest a small-sized fortune in providing himself with what is commonly supposed to be indispensable to a fisherman's outfit.

In the first place he must have at least five or six patent-jointed rods of various sizes, weights and materials, depending upon the particular kind of game to be captured.

It would never do in the world for the true sportsman and angler to try to hook a bass with a trout rod or vice versa, or

BASS AND SPLIT BAMBOO TROUT RODS. attempt to impose upon a simple minded porgy with a weakfish tackle, all of which goes to show how absolutely essential it is to observe the conventional rules in this respect.

It doesn't make any difference if the angler, who has provided himself with a full assortment of rods, the best laid cuttyhunk lines, an amply stocked fly book and patent bait and quill floats of all kinds, after beating all the way up stream and then beating down again, doesn't catch anything to speak of.

The backwoodsman's boy cuts a pole in the next lot and with no more tackle than a piece of packing twine, a two-for-a-cent book, a pellet of lead and a handful of worms, goes over the same brook and captures a fine basketful of trout.

This, however, only proved that the scientific angler was right, at least in his

One of the most important attachments to the fly rod is the reel. Old style reels of the best make can be bought for \$6 or \$6, but they are now rapidly being displaced by the newly invented automatic reel, which is especially valuable when it is necessary to fish with a long line.

It recovers "slack" with astonishing rapidity, the winding-in being accomplished by simply touching a spring like

which are useful at times and are sold at 35 to 60 cents each, according to size.

The fully equipped fisherman would also need a few long gut leaders, say nine fect in length, one or two double gut minnow gangs, a landing net No. 2, tackle book No. 1, trout bag No. 2 and a leather case for the rod, No. 8.

Of course, a fisherman going out on a long excursion, whether it be for trout or bass, can take as many other things with

perienced sportsman.

Possibly he may not need all the tackle Possibly he may not need all the tackle that has been enumerated, but it is better to have a good supply of everything on hand than to fall short in an emergency. One of the new faugled schemes for the convenience of lake trolling when a ne son is alone and has no one to row the boat for him, is the fishrod-holder, which can be attached to either gunwhale of the boat. In this way two or three trolling mes may be kept out at the same time, and the handles and reels are in easy each of the rower in case of a sudder

On this basis a very respectable outfit can be procured by a beginner for about \$200, which is not so very much after all when one considers with how little expense such an outfit can be kept up to the standard, and in the case of the most er-pensive articles at least it would probably never be necessary to make a second pur-
